

serving as the Commander of B Battery, 1st Battalion, 10th Field Artillery; target acquisition platoon leader for the 3rd Infantry Division Artillery; and S-2 (Intelligence) of the 3rd Infantry Division Artillery.

Brigadier General Glacel served for three years in Alaska as Operations Officer and Executive Officer, 1st Battalion, 37th Field Artillery, 172nd Light Infantry Brigade (Separate). Additionally, he served as an assistant Professor of Engineering at the United States Military Academy and in the office of the Deputy Chief of Staff for Personnel, Headquarters, Department of the Army.

In 1987, Brigadier General Glacel took command of the 1st Battalion, 4th Field Artillery, 2nd Infantry Division in the Republic of Korea, commanding the northern most Field Artillery site in South Korea and defending the Demilitarized Zone between North and South Korea. Brigadier General Glacel served as Political Military Planner in J-5 (Plans), the Joint Staff, Washington, D.C., where he was instrumental in the negotiations in Vienna, Austria, for the Conference for Security and Cooperation in Europe between the NATO, Warsaw Pact, and nonaligned countries.

In 1992, Brigadier General Glacel became the Division Artillery Commander for the 7th Infantry Division (Light) at Fort Ord, California. After inactivating that unit due to Congressionally mandated downsizing of the Army, Brigadier General Glacel served as Executive Officer to the Under Secretary of the Army in Washington, D.C.

In 1995, Brigadier General Glacel assumed the position of Chief of the Requirements and Programs Branch, Office of the Assistant Chief of Staff for Policy in SHAPE, Belgium. In this capacity, Brigadier General Glacel was responsible for the background studies leading to the enlargement of NATO to nineteen countries with the admission of Poland, Hungary, and the Czech Republic.

Brigadier General Glacel has spent the last two years as Commanding General of the U.S. Army's Test and Experimentation Command, Fort Hood, Texas. He is responsible for all operational testing of Army equipment with particular emphasis on the Force XXI digitized Army, the backbone of our future force.

Brigadier General Glacel is a graduate of the United States Army Command and General Staff College and the Industrial College of the Armed Forces. He holds masters degrees in both civil and mechanical engineering from the Massachusetts Institute of Technology as well as a masters degree in business administration from Boston University. His awards include the Legion of Merit, the Bronze Star Medal, the Defense Meritorious Service Medal, and the Meritorious Service Medal.

Mr. Speaker, Brigadier General Bob Glacel is the kind of officer that all soldiers strive to be. He has spent thirty years serving our country, mentoring young officers and soldiers, maintaining standards of excellence, and serving his country in an exemplary fashion. The U.S. Army is a better institution for his service. I know the Members of the House will join me in offering gratitude to Brigadier General Glacel and his family—his wife, Barbara, and his daughters, Jennifer, Sarah, and Ashley—for their service to our nation, and we wish them all the best in the years ahead.

EXTENSIONS OF REMARKS

IN CELEBRATION OF THE LIFE OF
RICHARD J. CRONIN, SR.

HON. ROBERT A. WEYGAND

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 5, 1999

Mr. WEYGAND. Mr. Speaker, I rise today to honor the memory of Richard J. Cronin, Sr., a distinguished Rhode Islander and close family friend to whom I owe a great deal. Richard was a model of the East Providence community and will be remembered by all as a dedicated, compassionate and selfless citizen.

During the course of our lives, we meet a handful of people who, we later realize, played integral roles in the development of our character. Richard Cronin was such a person in my life. My earliest memories of him date back to my childhood, when I would visit my grandparents in East Providence. Richard's family lived next door to them, and before long the Cronin family became as familiar to me as my own. While Richard and his wife Mildred chatted amiably with my grandparents, I would join the Cronin boys, Danny and Richard, in exploration of the neighborhood surrounding us.

I continued my contact with Richard throughout my professional career, and had the honor of serving with him on the East Providence Planning Board, of which he was a charter member and chairman. He retired from the board on May 20, 1980, with a distinguished record of service behind him. I succeeded him as chair of the Planning Board and drew on his example of honest and fair leadership to help me face this new challenge. Richard introduced me to the realm of public service, and I hope to maintain the high standards he expected of me and of those around him.

Richard wore many hats in the community and will be remembered for his numerous contributions. The owner of two businesses, Richard was a visible figure in the transportation and construction fields. He belonged to approximately a dozen trade organizations, and served as president of the Rhode Island Truck Owners Association and the New England Tank Truck Carriers. His community service was illustrated by his activity at St. Brendan Church and his status as board member of the East Providence Boys Club.

I attended Richard's memorial service last week and realized that all those present had been blessed by knowing this great man. He instilled in all of us a passion of life and a desire to improve ourselves and our surroundings. I will always consider him one of my mentors, the person who taught me the great joys and responsibilities of public service. I offer my most heartfelt sympathy to the family and friends that survived him and promise to honor his memory not only in words but also by striving to reach the high standards by which he lived his fruitful life.

August 5, 1999

DR. EDGAR WAYBURN,
TRAILBLAZER

HON. NANCY PELOSI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 5, 1999

Ms. PELOSI. Mr. Speaker, on Wednesday, August 11, President Clinton will present Dr. Edgar Wayburn, longtime environmental activist in the San Francisco Bay Area, with the Presidential Medal of Freedom. The White House ceremony marks yet another milestone along the trail of a lifelong pursuit of environmental wisdom. In spotlighting Edgar Wayburn's achievements, the President is also underscoring the critical importance of environmental conservation in an era of scarce water, warming climates, sprawling populations, overcrowded parks, disintegrating habitats, and declining species.

Indeed, Dr. Wayburn, the honorary president-for-life of the Sierra Club, has devoted most of his 92 years to the goals of preserving the world's wild areas and enhancing the natural environment for the benefit of future generations. In following this trail, he has always marched in the company of this own extraordinary wit and humor—and in the company of his extraordinarily supportive wife, Peggy, a force of nature in her own right.

Even in the context of his long commitment to the environment, however, Alaska came to occupy a special place in Dr. Wayburn's world view. More than 30 years ago, he and Peggy visited the northernmost state for the first time. Alaska has literally never been the same since that visit. Dr. Wayburn and Peggy were so captivated by the glories of the Alaskan landscape that he has devoted a generous share of his life to preserving its majestic vistas, lofty mountains, and free-flowing rivers.

The national campaign that flowed from that first visit, and the hundreds of visits that followed, culminated successfully in the enactment of the Alaska Lands Act, which President Carter signed into law in 1980. It remains the largest public lands legislation in the history of the U.S. Congress. Everyone associated with that epochal event will readily grant Dr. Wayburn the lion's share of the credit for playing such a critical and essential role in protecting the vast and varied landscapes of Alaska. Today, some 104 million acres remain wild largely because of the epiphany that occurred during Dr. Wayburn's first trip to "the last frontier."

Not content with his heavy lifting on behalf of the Alaskan wilderness, Dr. Wayburn was simultaneously engaged in the struggle to create and expand Redwood National Park in Northern California. He worked closely with our former colleague, the late Philip Burton, who led the long struggle that eventually brought forth the eternal preservation of a pristine example of ancient forest.

Few of us living in Northern California at the time will soon forget the fractious debate that ricocheted through the streets of our communities and the halls of Congress. The noise grew most thunderous when the advocates of local jobs and forest preservation stood toe-to-toe in verbal slugfests. At all times during this difficult journey, Dr. Wayburn was steadfast in
